Short description (max. signs 1100)

INDEWO® INOIS®TS live simple

The acoustic effect of the INOIS® TS provides a unique and homely atmosphere, in commercial as well as in the private sector. The combination of fleece and MDF slats can already be lacquered or refined covered with hard wax.

The panels fit ideally into all new and old buildings or remedial measures. The slat look makes the room appear deeper, larger and provides a modern eye-catcher. The result is reduced reverberation and a calming indoor climate.

With the INDEWO® series, euoplac aims to capture and reproduce the uniqueness and beauty that only nature offers us.
