

# Sustainability Statement

## 1 | RAW MATERIALS AND CONSTITUENTS

**1.1.** What components or raw materials do you work with?

Ash

**1.2.** Where do you source the individual components or raw materials from?

- From the country of production of this product
- From the continent where we produce this product
- worldwide

**1.3.** Are the raw materials or components certified or approved according to standards?  
If so, which ones?

no

**1.4.** Please clarify the material structure of the final product as well as the material composition expressed in %.

99% solid ash, 1% lacquer

**1.5.** How high is the proportion of renewable raw materials in your product as a %.

100%

**1.6.** What % of your raw materials used are recycled materials?

0%

**1.7.** Where required, additional comments about where you obtain your raw materials from and their origin:

the US

**2.1. Where do you produce your product?** (please specify also several production locations)

country of the head office

in China

**2.2. Is the production operation certified? If yes, in accordance with which one?**

no

**2.3. How do you grade production energy consumption?**

low

normal

high

**2.4. What energy source is used for production?**

0 % of power from renewable energy

**2.5. What % of renewable energy comes from in-house production?**

0 % of the electricity comes from renewable, self-generated energies

**2.6. The production waste is**

for 0 % returned to the production cycle

for 100 % recycled

for 0 % broken down organically (organic waste)

for 0 % thermically recycled (residual waste)

for 0 % professionally disposed of as specialist waste

for %

**2.7. What are you doing to treat the water used in production or to reduce your "Water Footprint"?**

-

**2.8. Where required, additional comments about how you obtain energy or dispose of waste**

-

### 3 | PACKAGING

**3.1. What type of packaging do you use?**

- disposable packaging     reusable packaging     both disposable and reusable  
 we do not package

**3.2. Your packaging material for this product is comprised of**

80 % from renewable materials    50 % from recycled material  
% from

**3.3. Type and material, packaging description**

Cardboard, plastic bags sand foam bags

**3.4. Your packaging material is produced in**

- country of the head office     same continent where the product is produced  
 intercontinental

**3.5. Where required, additional comments about your packaging**

### 4 | WAREHOUSING AND LOGISTICS

**4.1. You produce this product**

- as quickly available warehouse goods     just in time

**4.2. You distribute your product** (multiple answers possible)

- directly     via wholesale trade (online & stationary)  
 via stationary retail trade     via online retail trade

**4.3. Where required, additional comments about your Green Logistic**

## 5 | PRODUCT LIFE CYCLE

### 5.1. With proper daily use, your product lasts about

20 years  hours/months/years (operational)

### 5.2. How does the product keep its appearance when used at this frequency?

The product:

- shows traces of use and/or a nice patina
- shows a few traces of use, generally not for a while
- shows rather less traces of use, stays almost unaltered
- is a consumable and regularly replaced (e.g. candle, soap etc.)

### 5.3. What is there to say about care/maintenance?

A lacquered surface allows us to play with colors.

Inside the lacquered surface there is either a cast material in zinc or aluminum.

Generally, a lacquered surface is strong, but it's not scratch-resistant.

- Daily cleaning is done with a wrung cloth.
- Avoid pulling hard objects across the surface.
- Never use abrasive cleaning agents such as scouring powder and cream, as it may matt and scratch the surface.
- We discourage the use of any chemicals as it can make that lacquer over time slip from the casted material.

### 5.4. Where required, additional comments about the life cycle of the product

For transporting goods between warehouses we use an electric van.

## 6 | DISPOSAL AND RECYCLING

### 6.1. Can your product be recycled after the life cycle?

Yes  No

partly, namely

### 6.2. If so, where, for example?

wood recycling, create anything from wood pellets, paper...

**6.3. How can it otherwise be disposed?**

return to manufacturer or dealer

recycling centre

residual waste

organic waste

thermal recycling

specialist waste

**6.4. Where required, additional comments about disposal and recycling**

**7 | MISCELLANEOUS**

**What else you would like to say about the product**

(including social-responsibility and environmental standards, ecological analyses, carbon footprint, certification, standards, environmental management systems etc.)
