

1 | RAW MATERIALS AND CONSTITUENTS

1.1. What components or raw materials do you work with?

Polyester (PET)
Digital Printing Inks
Screen printing inks

1.2. Where do you source the individual components or raw materials from?

- From the country of production of this product
 From the continent where we produce this product
 worldwide

1.3. Are the raw materials or components certified or approved according to standards? If so, which ones?

Inks: REACH & RoHS Compliance, EN71
 Printing substrate (PET): REACH compliance, OEKO-TEX Standard 100, APEO-free adhesive formulations, fire retardant according to EN13501-1 (B-s1, d0)

1.4. Please clarify the material structure of the final product as well as the material composition expressed in %.

99% PET, 1% Screen Printing / Digital Printing Ink

1.5. How high is the proportion of renewable raw materials in your product as a %.

100% PET

1.6. What % of your raw materials used are recycled materials?

0%

1.7. Where required, additional comments about where you obtain your raw materials from and their origin:

2.1. Where do you produce your product? (please specify also several production locations)

country of the head office

in

2.2. Is the production operation certified? If yes, in accordance with which one?

QMS according to Shipbuilding Directive 2014/90 EU (Module D)

2.3. How do you grade production energy consumption?

low

normal

high

2.4. What energy source is used for production?

100 % of power from renewable energy

2.5. What % of renewable energy comes from in-house production?

0 % of the electricity comes from renewable, self-generated energies

2.6. The production waste is

for % returned to the production cycle

for 100 % recycled

for % broken down organically (organic waste)

for % thermally recycled (residual waste)

for % professionally disposed of as specialist waste

for %

2.7. What are you doing to treat the water used in production or to reduce your "Water Footprint"?

Water is only used in the case of screen printing. There is a water treatment plant in the department. No industrially polluted wastewater is produced.

2.8. Where required, additional comments about how you obtain energy or dispose of waste

PV system - electricity is fed into the grid.

Paper, cardboard and plastics (sorted) are collected by the waste management company for recycling.

3.1. What type of packaging do you use?

- disposable packaging
 reusable packaging
 both disposable and reusable
 we do not package

3.2. Your packaging material for this product is comprised of

% from renewable materials 100 % from recycled material
 % from

3.3. Type and material, packaging description

Packaging board made from recycled material

3.4. Your packaging material is produced in

- country of the head office same continent where the product is produced
 intercontinental

3.5. Where required, additional comments about your packaging**4.1. You produce this product**

- as quickly available warehouse goods just in time

4.2. You distribute your product (multiple answers possible)

- directly via wholesale trade (online & stationary)
 via stationary retail trade via online retail trade

4.3. Where required, additional comments about your Green Logistic

5.1. With proper daily use, your product lasts about

years hours/months/years (operational)

5.2. How does the product keep its appearance when used at this frequency?

The product:

- shows traces of use and/or a nice patina
- shows a few traces of use, generally not for a while
- shows rather less traces of use, stays almost unaltered
- is a consumable and regularly replaced (e.g. candle, soap etc.)

5.3. What is there to say about care/maintenance?

- Dust can be removed with a lint-free cloth or a vacuum cleaner with a (clean) brush.
- Slight stains can be removed with a damp microfibre cloth
- Do not clean with aggressive cleaning agents/solvents
- Do not clean with a wet sponge, steam or water jet, otherwise the adhesive property may be lost

5.4. Where required, additional comments about the life cycle of the product

6 | DISPOSAL AND RECYCLING

6.1. Can your product be recycled after the life cycle?

Yes No

partly, namely

6.2. If so, where, for example?

6.3. How can it otherwise be disposed?

return to manufacturer or dealer

organic waste

recycling centre

thermal recycling

residual waste

specialist waste

6.4. Where required, additional comments about disposal and recycling

7 | MISCELLANEOUS

What else you would like to say about the product

(including social-responsibility and environmental standards, ecological analyses, carbon footprint, certification, standards, environmental management systems etc.)
carbon footprint for companies: www.ecocockpit.de

Annual CO2e accounting since 2021. The CO2e footprint was reduced by around 25% through various measures during this time.
