

Sustainability Statement

1 | RAW MATERIALS AND CONSTITUENTS

1.1. What components or raw materials do you work with?

Polymer coating with a proportion of renewable raw materials.
Cotton backing material.

1.2. Where do you source the individual components or raw materials from?

- ☐ From the country of production of this product
☐ From the continent where we produce this product
☒ worldwide

1.3. Are the raw materials or components certified or approved according to standards? If so, which ones?

Continental Sustainability Strategy Supply Chain
see
<https://www.continental.com/en/sustainability/sustainability-framework/responsible-value-chain/>

1.4. Please clarify the material structure of the final product as well as the material composition expressed in %.

coated textile in a multi-layer structure
approx. 78 % PVC-compound
approx. 22 % CO-knitted fabric

1.5. How high is the proportion of renewable raw materials in your product as a %.

Virgin petroleum content 41% / Bio based content 24% / Inorganic content 35%

1.6. What % of your raw materials used are recycled materials?

Recycled content 0%

1.7. Where required, additional comments about where you obtain your raw materials from and their origin:

2.1. Where do you produce your product? (please specify also several production locations)☒ country of the head office☐ in**2.2. Is the production operation certified? If yes, in accordance with which one?**

ISO 9001, ISO 14001, ISO 50001, ISO 450001

2.3. How do you grade production energy consumption?☐ low☒ normal☐ high**2.4. What energy source is used for production?**

100 % of power from renewable energy

2.5. What % of renewable energy comes from in-house production?

0 % of the electricity comes from renewable, self-generated energies

2.6. The production waste is

for % returned to the production cycle

for % recycled

for % broken down organically (organic waste)

for % thermically recycled (residual waste)

for % professionally disposed of as specialist waste

for 100 % recycled, thermally disposed of

2.7. What are you doing to treat the water used in production or to reduce your "Water Footprint"?Measures within the framework of ISO 14001 certification
Environmental management system**2.8. Where required, additional comments about how you obtain energy or dispose of waste**

Measures within the framework of the ISO 14001 (Environmental Management) and ISO 50001 (Energy Management) certifications

3 | PACKAGING

3.1. What type of packaging do you use?

- ☒ disposable packaging ☒ reusable packaging ☐ both disposable and reusable
☐ we do not package

3.2. Your packaging material for this product is comprised of

% from renewable materials % from recycled material
 % from

3.3. Type and material, packaging description

A. Cardboard tube made from recycled cardboard (100% recycled material, see above)
B. Recyclable PE film

3.4. Your packaging material is produced in

- ☐ country of the head office ☒ same continent where the product is produced
☐ intercontinental

3.5. Where required, additional comments about your packaging

For deliveries of large quantities, wooden racks are used on pallets; these can be reused multiple times.

4 | WAREHOUSING AND LOGISTICS

4.1. You produce this product

- ☒ as quickly available warehouse goods ☐ just in time

4.2. You distribute your product (multiple answers possible)

- ☒ directly ☒ via wholesale trade (online & stationary)
☐ via stationary retail trade ☐ via online retail trade

4.3. Where required, additional comments about your Green Logistic

5.1. With proper daily use, your product lasts about

several hours/months/years (operational)

5.2. How does the product keep its appearance when used at this frequency?

The product:

- ☐ shows traces of use and/or a nice patina
- ☒ shows a few traces of use, generally not for a while
- ☐ shows rather less traces of use, stays almost unaltered
- ☐ is a consumable and regularly replaced (e.g. candle, soap etc.)

5.3. What is there to say about care/maintenance?

To maintain the material properties, we recommend cleaning the material surface regularly. For light soiling or stains caused by food such as red wine, ketchup, mustard or coffee, cleaning with skai® cleaner or a warm, mild soapy solution and a microfiber cloth is usually sufficient. Stubborn stains such as those made by permanent markers, ballpoint pens and lipsticks can be removed without residue by promptly cleaning with isopropyl or rubbing alcohol. If you follow this rule, the material surface will stay as good as new for longer.

5.4. Where required, additional comments about the life cycle of the product
6.1. Can your product be recycled after the life cycle?

- ☐ Yes ☐ No
- ☒ partly, namely through individual recycling processes

6.2. If so, where, for example?

6.3. How can it otherwise be disposed?

☐ return to manufacturer or dealer

☐ organic waste

☐ recycling centre

☒ thermal recycling

☐ residual waste

☐ specialist waste

☐☐

6.4. Where required, additional comments about disposal and recycling

Composite processing (gluing, etc.) generally makes recycling more difficult and should be avoided.

7 | MISCELLANEOUS

What else you would like to say about the product

(including social-responsibility and environmental standards, ecological analyses, carbon footprint, certification, standards, environmental management systems etc.)

carbon footprint for companies: www.ecockpit.de
