

Sustainability Statement

1 | RAW MATERIALS AND CONSTITUENTS

1.1. What components or raw materials do you work with?

Cellulose fleece

1.2. Where do you source the individual components or raw materials from?

From the country of production of this product

From the continent where we produce this product

worldwide

1.3. Are the raw materials or components certified or approved according to standards?
If so, which ones?

- Standard 100 by Oeko-Text
- FSC

1.4. Please clarify the material structure of the final product as well as the material composition expressed in %.

Cellulose fleece is made out of:

- Cellulose (75-85%)
- textile fibre (5-20%)
- thickener etc. (2-8%)

1.5. How high is the proportion of renewable raw materials in your product as a %.

Cellulose (75-85%)

1.6. What % of your raw materials used are recycled materials?

1.7. Where required, additional comments about where you obtain your raw materials from and their origin:

2.1. Where do you produce your product? (please specify also several production locations)

country of the head office X

in

2.2. Is the production operation certified? If yes, in accordance with which one?

ISO 9001

ISO 14001

ISO 5001

2.3. How do you grade production energy consumption?

low

normal X

high

2.4. What energy source is used for production?

0 % of power from renewable energy

2.5. What % of renewable energy comes from in-house production?

% of the electricity comes from renewable, self-generated energies

2.6. The production waste is

for % returned to the production cycle

for 87 % recycled

for % broken down organically (organic waste)

for % thermically recycled (residual waste)

for % professionally disposed of as specialist

for waste %

2.7. What are you doing to treat the water used in production or to reduce your "Water Footprint"?

2.8. Where required, additional comments about how you obtain energy or dispose of waste

Our main waste fraction - the catch material - is produced during the sorting of paper fibres in stock preparation and consists of low-quality fibre material that is unsuitable for the production of woodchip and paper based wallpapers. This material is recycled in energy generation or in the production of building materials.

3 | PACKAGING

3.1. What type of packaging do you use?

disposable packaging reusable packaging both disposable and reusable
we do not package

3.2. Your packaging material for this product is comprised of

93 %from renewable materials 90 % from recycled material

3.3. Type and material, packaging description

IPET shrink film
paper label
outer packaging

3.4. Your packaging material is produced in

country of the head office same continent where the product is produced
intercontinental

3.5. Where required, additional comments about your packaging

4 | WAREHOUSING AND LOGISTICS

4.1. You produce this product

as quickly available warehouse goods just in time

4.2. You distribute your product (multiple answers possible)

directly via wholesale trade (online & stationary)
via stationary retail trade via online retail trade

4.3. Where required, additional comments about your Green Logistic

5.1. With proper daily use, your product lasts about
+/- 30 years hours/months/years (operational)

5.2. How does the product keep its appearance when used at this frequency?

The product:

shows traces of use and/or a nice patina

shows a few traces of use, generally not for a while

shows rather less traces of use, stays almost unaltered X

is a consumable and regularly replaced (e.g. candle, soap etc.)

5.3. What is there to say about care/maintenance?

can be painted over multiple times

5.4. Where required, additional comments about the life cycle of the product

6.1. Can your product be recycled after the life cycle?

Yes

No X

partly, namely

6.2. If so, where, for example?

6.3. How can it otherwise be disposed?

return to manufacturer or dealer

recycling centre

residual waste

organic waste

thermal recycling

specialist waste

6.4. Where required, additional comments about disposal and recycling

27 MISCELLANEOUS

What else you would like to say about the product
(including social-responsibility and environmental standards, ecological analyses,
carbon footprint, certification, standards, environmental management systems etc.)
carbon footprint for companies: www.ecockpit.de

- Suitable for allergy sufferers, TÜV certificate SEG-2001/06
- OEKO-Tex standard 100 (17.0.06525)
- EPD / Environmental Product Declaration | Declaration number EPD-ESK-20160267-IBC1-DE
- ERFURT is the first wallpaper manufacturer to be a member of the DGNB since 2009
- DIN EN ISO 14001 (environmental management)
