Product life cycle in the CNW

Short description (max. signs 1100)

COLORPLAC be rooted is one of the youngest, ecological and innovative fine wood design products from europlac - the fine wood panel in birch exc. with a very stable, but extremely natural surface. Europlac attaches great importance to high abrasion resistance, toy safety, saliva and sweat resistance with grazing of evaporating pollutants. This enables a multi-faceted application potential in the private as well as in the commercial sector without losing sight of the sustainability concept.
