

Sustainability Statement

1 | RAW MATERIALS AND CONSTITUENTS

1.1. What components or raw materials do you work with?

High-quality MDF board without added formaldehyde
Noble wood
Glue, wax, oil, water, colours

1.2. Where do you source the individual components or raw materials from?

- ☐ country of the head office
☒ Europe
☐ globally, namely from:

1.3. Are the raw materials or components certified or approved according to standards? If so, which ones?

EU criteria of the Timber Trade Regulation (EU Timber Regulation) No. 995/2010
PEFC - Programme for the Endorsement of Forest Certification Schemesint
FSC® - Forest Stewardship Council
MDF FF is also classified as F**** according to JIS A 1460, for thicknesses of 9 - 30 mm
interseroh - packaging subject to system participation in a dual system

1.4. Please clarify the material structure of the final product as well as the material composition expressed in percentage

approx. 95% carrier plate
approx 5% glue, varnish

1.5. How high is the proportion of renewable raw materials in your product as a percentage

100% - because only sustainable noble wood is used - renewable raw material

1.6. Where required, additional comments about where you obtain your raw materials from and their origin

Our noble woods and raw materials come from sustainable, certified and therefore responsibly managed forests (PEFC and FSC).

2 | PRODUCTION

2.1. Where do you produce your product? (please specify also several production locations)

- ☒ country of the head office
☐ Europe
☐ globally, namely from:

2.2. Is the production operation certified? If yes, in accordance with which one?

We are FSC® and PEFC certified company
interseroh - packaging subject to participation in a dual system
We can also produce our materials according to LEED and GREEN BUILDING conditions.

2.3. How do you grade production energy consumption?

- ☐ low ☒ normal ☐ high

2.4. What energy source is used for production?

% of power from renewable energy

2.5. The production waste is

55	% recycled	40	% wood waste incineration
	% broken down organically (organic waste)		%
	% thermally recycled (residual waste)		%
5	% professionally disposed of as specialist waste		

2.6. Where required, additional comments about how you obtain energy or dispose of waste

Thermal recycling directly in the company to generate energy (especially heating)

europac is interseroh certified

3 | PACKAGING

3.1. Your packaging material for this product is comprised of

90	% from renewable materials	7	% from recycled material
3	% from Plastic packaging tapes		

3.2. You use

☒ disposable packaging ☐ reusable packaging ☐ both with this product

3.3. Type and material, packaging description

Transport packaging - wooden pallets and cardboard
ECO tapes made of recycled paper
Plastic straps

3.4. Your packaging material is produced in

☐ country of the head office ☒ Europe ☐ globally

3.5. Where required, additional comments about your packaging

Great emphasis is placed on avoidance of unnecessary packaging and plastic

4 | WAREHOUSING AND LOGISTICS

4.1. You produce this product

☐ as quickly available warehouse goods ☐ just in time

Your product is stored at:

☒ country of the head office
☐ Europe
☐ other countries, namely

4.2. You distribute your product

☐ directly ☒ via trade ☐ both

4.3. Where required, additional comments about your Green Logistic

Our logistics planning places the greatest value on avoiding unnecessary traffic routes and looks for optimal connections.

5 | PRODUCT LIFE CYCLE

5.1. With proper daily use, your product lasts about

at least 25 years hours/months/years (operational)

5.2. How does the product keep its appearance when used at this frequency?

The product:

- ☐ shows traces of use and/or a nice patina
- ☒ shows a few traces of use, generally not for a while
- ☐ shows rather less traces of use, stays almost unaltered
- ☐ is a consumable and regularly replaced (e.g. candle, soap etc.)

5.3. What is there to say about care/maintenance?

Commercial wood care products

Can be maintained as normal, like all wood-based materials (if possible, do not use any sharp cleaning agents or cleaning utensils)

5.4. Where required, additional comments about the life cycle of the product

With good care, an extremely durable product - over many decades

6 | DISPOSAL AND RECYCLING

6.1. Can your product be recycled after the life cycle?

- ☒ Yes ☐ No
- ☐ partly, namely

6.2. If so, where, for example?

Recycling in the wood industry e.g. chipboard production.

6.3. How can it otherwise be disposed?

- | | | |
|---|--|--|
| <input checked="" type="checkbox"/> recycling | <input type="checkbox"/> recycling centre | <input checked="" type="checkbox"/> residual waste |
| <input type="checkbox"/> organic waste | <input type="checkbox"/> thermal recycling | <input type="checkbox"/> specialist waste |
| <input type="checkbox"/> | | |
| <input type="checkbox"/> | | |
| <input type="checkbox"/> | | |

6.4. Where required, additional comments about disposal and recycling

Trouble-free disposal in residual waste - no special waste.

7 | MISCELLANEOUS

What else you would like to say about the product

(including social-responsibility and environmental standards, ecological analyses, carbon footprint, certification, standards, environmental management systems etc.)

carbon footprint for companies: www.ecockpit.de

FSC® - certified sustainable product

Renewable noble wood material of European and sustainable origin

NO tropical wood is used
