Product life cycle in the CNW

### Short description (max. signs 1100)

Japan draws design references from classic Japanese architecture. The handle is reduced to its pure essence - there is no embellishment, just simplicity and precision. Well-proportioned and elegant with a characteristic floating projection.

VE2 is Morten Lauritzen and Hugo Dines Schmidt. Founded in 2007, the design studio is located in Aarhus. Both designers are graduates of Aarhus School of Architecture and they focus on durable designs which are based on quality, honesty and the designs' ability to create aesthetic and functional value for the user. Since its foundation, the studio has earned huge respect at home and abroad for brands such as Zone Denmark and Skagerak. VE2 primarily works in product design and interior design, ideally in the intersection between these two fields, since products always have an impact on the interior in which they are placed. VE2 has been a regular design partner for furnipart for many years and has designed many of our most popular handles and knobs.

## 2 | PRODUCT DETAILS

### Furniture handles

Product category  
Ash, 994 - Stained black  
Material A  
Kitchen, bathroom and furniture  
Application areas  
no  
Light transmission
