### Short description (max. signs 1100)

Inspiration for Edge Straight came from the desire to design the ultimate edge mounted handle. Edge straight has timeless elegance and an excellent grip. It is versatile, easy to install on standard panels and economical to produce in a range of lengths and finishes.

Finish 94 - bronze antique

The Edge Straight profile handle comes in antique bronze, which, with its warm and elegant look, can be an aesthetic element in your home. With the antique bronze finish you can create a sense of cohesion in your home by using a consistent color palette with repeating accent colors and carrying a unified design style throughout. Or you embrace contemporary flair with a variety of shapes and finishes.
