

# Sustainability Statement

## 1 | RAW MATERIALS AND CONSTITUENTS

### 1.1. What components or raw materials do you work with?

Aluminium

### 1.2. Where do you source the individual components or raw materials from?

- ☐ From the country of production of this product
- ☐ From the continent where we produce this product
- ☒ worldwide

### 1.3. Are the raw materials or components certified or approved according to standards? If so, which ones?

Aluminium A6063 A-T5

### 1.4. Please clarify the material structure of the final product as well as the material composition expressed in %.

99,99% aluminium ingot and 0,01 surface treatment

### 1.5. How high is the proportion of renewable raw materials in your product as a %.

100

### 1.6. What % of your raw materials used are recycled materials?

0

### 1.7. Where required, additional comments about where you obtain your raw materials from and their origin:

-

**2.1. Where do you produce your product?** (please specify also several production locations)☐ country of the head office☒ in China**2.2. Is the production operation certified? If yes, in accordance with which one?**

The production is certified with the environmental management system ISO 14001:2015.

**2.3. How do you grade production energy consumption?**☐ low☒ normal☐ high**2.4. What energy source is used for production?**

0 % of power from renewable energy

**2.5. What % of renewable energy comes from in-house production?**

0 % of the electricity comes from renewable, self-generated energies

**2.6. The production waste is**

for 100 % returned to the production cycle

for 0 % recycled

for 0 % broken down organically (organic waste)

for 0 % thermically recycled (residual waste)

for 0 % professionally disposed of as specialist waste

for %

**2.7. What are you doing to treat the water used in production or to reduce your "Water Footprint"?**

The factory is subject to well-developed and enforced regulations pertaining to effluent quality and has not been subject to any significant discharge violations. The factory do wastewater pre-treatment onsite. Control parameters have been provided in the effluent test report. RSL declarations (using the V.4.0 RSL declaration form) have been obtained for all product relevant chemicals. Both intentional product inputs and process chemicals enter the effluent/sludge during the final manufacturing stage.

**2.8. Where required, additional comments about how you obtain energy or dispose of waste**

-

### 3 | PACKAGING

**3.1. What type of packaging do you use?**

- ☒ disposable packaging      ☐ reusable packaging      ☐ both disposable and reusable  
☐ we do not package

**3.2. Your packaging material for this product is comprised of**

100 % from renewable materials      0 % from recycled material  
% from

**3.3. Type and material, packaging description**

Plastic bags and cardboard boxes.

**3.4. Your packaging material is produced in**

- ☐ country of the head office      ☒ same continent where the product is produced  
☐ intercontinental

**3.5. Where required, additional comments about your packaging**

-

### 4 | WAREHOUSING AND LOGISTICS

**4.1. You produce this product**

- ☒ as quickly available warehouse goods      ☐ just in time

**4.2. You distribute your product** (multiple answers possible)

- ☒ directly      ☒ via wholesale trade (online & stationary)  
☒ via stationary retail trade      ☒ via online retail trade

**4.3. Where required, additional comments about your Green Logistic**

Orders are grouped for delivery (per customer, per area) to avoid too frequent shipments. Larger orders are grouped and loaded on pallets, which means less packaging waste.

## 5 | PRODUCT LIFE CYCLE

### 5.1. With proper daily use, your product lasts about

11 years

hours/months/years (operational)

### 5.2. How does the product keep its appearance when used at this frequency?

The product:

- ☒ shows traces of use and/or a nice patina
- ☐ shows a few traces of use, generally not for a while
- ☐ shows rather less traces of use, stays almost unaltered
- ☐ is a consumable and regularly replaced (e.g. candle, soap etc.)

### 5.3. What is there to say about care/maintenance?

Daily cleaning is done with a hard-wrung cloth.

### 5.4. Where required, additional comments about the life cycle of the product

-

## 6 | DISPOSAL AND RECYCLING

### 6.1. Can your product be recycled after the life cycle?

- ☒ Yes   ☐ No
- ☐ partly, namely

### 6.2. If so, where, for example?

New handles or other products made of aluminium.

**6.3. How can it otherwise be disposed?**

☐ return to manufacturer or dealer

☐ organic waste

☐☐

☒ recycling centre

☐ thermal recycling

☐ residual waste

☐ specialist waste

**6.4. Where required, additional comments about disposal and recycling**

-

## 7 | MISCELLANEOUS

**What else you would like to say about the product**

(including social-responsibility and environmental standards, ecological analyses, carbon footprint, certification, standards, environmental management systems etc.)  
carbon footprint for companies: [www.ecocockpit.de](http://www.ecocockpit.de)

Human rights risks are assessed for the manufacturing stage. The factory is assessed with a SMETA audit (Sedex Members Ethical Trade Audit) conducted by Sedex. The audit assesses the factory's ethical and social compliance in areas like labor, health & safety, environment, and business ethics.
