

Sustainability Statement

1 | RAW MATERIALS AND CONSTITUENTS

1.1. What components or raw materials do you work with?

We work with FSC-Certified wood and ECO_friendly vegal linen colored with plant extracts. Electrical components.

1.3. Where do you source the individual components or raw materials from?

- ☐ From the country of production of this product
- ☒ From the continent where we produce this product
- ☐ worldwide

1.3. Are the raw materials or components certified or approved according to standards? If so, which ones?

Yes we produce our lamps in certified materials like ECO-friendly Vegan linen and FSC-Certified wood. The vegan linen is dyed with plant extracts and the Eco-frindly collection is made with reduced water discharge.

1.4. Please clarify the material structure of the final product as well as the material composition expressed in %.

The Esstisch light consists of about 30% electrical components, 20% wood, and 40% vegan linen and 10% metal frame.

1.5. How high is the proportion of renewable raw materials in your product as a %.

about 30 %

1.6. What % of your raw materials used are recycled materials?

We do not use recycled materials.

1.7. Where required, additional comments about where you obtain your raw materials from and their origin:

Europe

2 | PRODUCTION

2.1. Where do you produce your product? (please specify also several production locations)

☐ country of the head office

☒ in Europe

2.2. Is the production operation certified? If yes, in accordance with which one?

The linen is vegan certified and the wood is FSC-certified

2.3. How do you grade production energy consumption?

☒ low

☐ normal

☐ high

2.4. What energy source is used for production?

% of power from renewable energy

2.5. What % of renewable energy comes from in-house production?

% of the electricity comes from renewable, self-generated energies

2.6. The production waste is

for % returned to the production cycle

for 20 % recycled

for 40 % broken down organically (organic waste)

for % thermically recycled (residual waste)

for % professionally disposed of as specialist waste

for %

2.7. What are you doing to treat the water used in production or to reduce your "Water Footprint"?

Efforts have been made to reduce energy consumption, and water usage has been minimized with eco-friendly linen. A product that requires minimal water usage. Plant extracts are used to dye the linen yarn, ensuring that no unnecessary chemicals are used or released.

We strive to give something back to nature and minimize our CO2 footprint by planting trees through Forest Nation. For every lamp sold, a new tree is planted.

2.8. Where required, additional comments about how you obtain energy or dispose of waste

3 | PACKAGING

3.1. What type of packaging do you use?

- ☐ disposable packaging ☒ reusable packaging ☐ both disposable and reusable
☐ we do not package

3.2. Your packaging material for this product is comprised of

70 % from renewable materials % from recycled material
% from

3.3. Type and material, packaging description

We use cardboard for the lamps, with the ceiling rosette wrapped in paper to avoid plastic. For our letter to the customer, we use recycled paper. We include a small plant kit in a biodegradable cup with soil and two tree seeds, so the customer can plant a tree of their own.

3.4. Your packaging material is produced in

- ☐ country of the head office ☐ same continent where the product is produced
☒ intercontinental

3.5. Where required, additional comments about your packaging

4 | WAREHOUSING AND LOGISTICS

4.1. You produce this product

- ☒ as quickly available warehouse goods ☐ just in time

4.2. You distribute your product (multiple answers possible)

- ☒ directly ☒ via wholesale trade (online & stationary)
☐ via stationary retail trade ☐ via online retail trade

4.3. Where required, additional comments about your Green Logistic

5 | PRODUCT LIFE CYCLE

5.1. With proper daily use, your product lasts about

10-15 years hours/months/years (operational)

5.2. How does the product keep its appearance when used at this frequency?

The product:

- ☐ shows traces of use and/or a nice patina
- ☒ shows a few traces of use, generally not for a while
- ☐ shows rather less traces of use, stays almost unaltered
- ☐ is a consumable and regularly replaced (e.g. candle, soap etc.)

5.3. What is there to say about care/maintenance?

The lampshade can be cleaned with a soft cloth or gently with a dusting brush. The top plate can also be carefully wiped with a soft cloth. Avoid using cleaning agents on the lamp.

5.4. Where required, additional comments about the life cycle of the product

Linen shade: Linen is a durable material but can be affected by factors such as dust, moisture, and light. If the lamp is used correctly, the linen shade can last for many years. Gentle wiping and careful handling can extend its lifespan.

Electrical components (light source, cables, etc.): The electrical components, such as the lamp and the cable, typically have a lifespan of 1,000 to 2,000 hours, but this depends on the type of lamp and its usage.

6 | DISPOSAL AND RECYCLING

6.1. Can your product be recycled after the life cycle?

- ☐ Yes ☐ No
- ☒ partly, namely

6.2. If so, where, for example?

the metal frame can be reused maybe some of the electrical components

6.3. How can it otherwise be disposed?

☒ return to manufacturer or dealer

☒ organic waste

☐☐

☐ recycling centre

☐ thermal recycling

☐ residual waste

☐ specialist waste

6.4. Where required, additional comments about disposal and recycling

The linen should be in Bio waste

7 | MISCELLANEOUS
