Manufacturer Item no.

Product life cycle in the CNW

Short description (max. signs 1100)

Mynt is a Mainz-based start-up for innovative and ecological wall paints and varnishes. Paint products are currently responsible for 58% of the microplastics (source: Forbes) in the world's oceans and also create an unhealthy living environment. This is mainly due to the fact that conventional wall paints are based on petroleum. Mynt is one of the pioneers in Europe trying to solve this problem by using ecological formulas instead of petroleum and microplastics. The startup offers a curated color palette of sustainable trend colors for a wide variety of surfaces to meet the needs of end consumers as well as innovative interior architects and interior designers who attach particular importance to sustainability and healthy living.

2 | PRODUCT DETAILS
