

Sustainability Statement

1 | RAW MATERIALS AND CONSTITUENTS

1.1. What components or raw materials do you work with?

Water; Decovery®; titanium dioxide; mineral pigments; silica; cellulose; rapeseed and castor oil surfactants; silicates; ammonia solution; benzisothiazolinone; sodium pyrrhione. The packaging consists of recyclable metal buckets. The outer cartons and protective materials are made from 100% recycled paper.

1.2. Where do you source the individual components or raw materials from?

- ☒ From the country of production of this product
- ☐ From the continent where we produce this product
- ☐ worldwide

1.3. Are the raw materials or components certified or approved according to standards? If so, which ones?

WELL Building Standard: Focuses on the health and well-being of people in buildings. EU-Ecolabel: Focuses on the environmental impact of a product throughout its entire life cycle. AgBB-Zertifikat: Focuses on the health safety of construction products in indoor areas.

1.4. Please clarify the material structure of the final product as well as the material composition expressed in %.

See 1.1 As the color products are not to be disclosed, we are unfortunately unable to provide exact material compositions in %.

1.5. How high is the proportion of renewable raw materials in your product as a %.

about 40%

1.6. What % of your raw materials used are recycled materials?

-

1.7. Where required, additional comments about where you obtain your raw materials from and their origin:

Water: Pure spring water sourced from the Harz Mountains. Decovery®: Certified bio-based binder made from pine and castor plants. Mineral pigments: Natural pigments that provide the colour tone.

2.1. Where do you produce your product? (please specify also several production locations)☒ country of the head office☐ in**2.2. Is the production operation certified? If yes, in accordance with which one?**

Product certificate "Allergy-friendly" from the Institute for Environment and Health (IUG), Decopaint certificate for VOC content, certificate for residential medicine for wall paint, Byggvarubedömningen, Italian CAM, BREEAM NOR 2016, ECOproduct Norway, EU Ecolabel, Nordic Swan, WELL Building Standard, BREEAM International, certificate according to AgBB evaluation scheme of the Belgian and French emission guidelines, LEED v4. 1, VOC EMISSION TEST REPORT Indoor Air Comfort GOLD, VOC EMISSION TEST REPORT M1

2.3. How do you grade production energy consumption?☐ low☒ normal☐ high**2.4. What energy source is used for production?**

100 % of power from renewable energy

2.5. What % of renewable energy comes from in-house production?

- % of the electricity comes from renewable, self-generated energies

2.6. The production waste is

for % returned to the production cycle

for % recycled

for 100 % broken down organically (organic waste)

for % thermically recycled (residual waste)

for % professionally disposed of as specialist waste

for %

2.7. What are you doing to treat the water used in production or to reduce your "Water Footprint"?

-

2.8. Where required, additional comments about how you obtain energy or dispose of waste

-

3 | PACKAGING

3.1. What type of packaging do you use?

- ☐ disposable packaging ☒ reusable packaging ☐ both disposable and reusable
☐ we do not package

3.2. Your packaging material for this product is comprised of

% from renewable materials % from recycled material
100 % from recyclable tin container

3.3. Type and material, packaging description

Packaging materials are recyclable metal buckets (2.5L), in addition the cardboard boxes and packaging protection are made from 100% recycled waste paper

3.4. Your packaging material is produced in

- ☒ country of the head office ☐ same continent where the product is produced
☐ intercontinental

3.5. Where required, additional comments about your packaging

-

4 | WAREHOUSING AND LOGISTICS

4.1. You produce this product

- ☒ as quickly available warehouse goods ☐ just in time

4.2. You distribute your product (multiple answers possible)

- ☒ directly ☐ via wholesale trade (online & stationary)
☐ via stationary retail trade ☐ via online retail trade

4.3. Where required, additional comments about your Green Logistic

-

5 | PRODUCT LIFE CYCLE

5.1. With proper daily use, your product lasts about

- hours/months/years (operational)

5.2. How does the product keep its appearance when used at this frequency?

The product:

- ☐ shows traces of use and/or a nice patina
- ☐ shows a few traces of use, generally not for a while
- ☒ shows rather less traces of use, stays almost unaltered
- ☐ is a consumable and regularly replaced (e.g. candle, soap etc.)

5.3. What is there to say about care/maintenance?

Correct application of the paint ensures a long-lasting result

5.4. Where required, additional comments about the life cycle of the product

Once the paint has been applied, it cannot be recovered, but the packaging material can be reused.

6 | DISPOSAL AND RECYCLING

6.1. Can your product be recycled after the life cycle?

☐ Yes ☐ No

☒ partly, namely the packaging

6.2. If so, where, for example?

In a paper, plastic or metal recovery plant

6.3. How can it otherwise be disposed?

☐ return to manufacturer or dealer

☐ organic waste

☒ recycling centre

☐ thermal recycling

☐ residual waste

☐ specialist waste

☐☐

6.4. Where required, additional comments about disposal and recycling

-

7 | MISCELLANEOUS

What else you would like to say about the product

(including social-responsibility and environmental standards, ecological analyses, carbon footprint, certification, standards, environmental management systems etc.)

carbon footprint for companies: www.ecockpit.de

We have completed a life cycle assessment for our wall paint and are in the process of verifying an Environmental Product Declaration (EPD)
