

Sustainability Statement

1 RAW MATERIALS AND CONSTITUENTS

1.1. What components or raw materials do you work with?

Bleached Eucalyptus pulp
Titanium dioxide
Mineral filler
Pigments

1.2. Where do you source the individual components or raw materials from?

- ☐ From the country of production of this product
☐ From the continent where we produce this product
☒ worldwide

1.3. Are the raw materials or components certified or approved according to standards? If so, which ones?

Pulp: Forestry Stewardship Council (FSC) - Chain of Custody

1.4. Please clarify the material structure of the final product as well as the material composition expressed in %.

Bleached Eucalyptus pulp (approx. 70%), Titanium dioxide (approx. 10%), Mineral filler (approx. 20%), Pigments (< 1%)

1.5. How high is the proportion of renewable raw materials in your product as a %.

Bleached Eucalyptus pulp (approx. 70%)

1.6. What % of your raw materials used are recycled materials?

0%

1.7. Where required, additional comments about where you obtain your raw materials from and their origin:

Nothing to add

2.1. Where do you produce your product? (please specify also several production locations)

- ☐ country of the head office
- ☒ in Production sites in Europe, Asia, South America

2.2. Is the production operation certified? If yes, in accordance with which one?

ISO 9001

2.3. How do you grade production energy consumption?

- ☐ low ☐ normal ☒ high

2.4. What energy source is used for production?

22% % of power from renewable energy

2.5. What % of renewable energy comes from in-house production?

7 % of the electricity comes from renewable, self-generated energies

2.6. The production waste is

- for 38 % returned to the production cycle
- for 40 % recycled
- for % broken down organically (organic waste)
- for % thermically recycled (residual waste)
- for 22 % professionally disposed of as specialist waste
- for %

2.7. What are you doing to treat the water used in production or to reduce your "Water Footprint"?

Wastewater: the plant is equipped with an effluent plant (chemical + biological waste), measurement of standard KPIs, internal + external KPIs.

Water consumption: partial recycling of water, operating procedures, KPIs

2.8. Where required, additional comments about how you obtain energy or dispose of waste

3 | PACKAGING

3.1. What type of packaging do you use?

- ☐ disposable packaging ☐ reusable packaging ☒ both disposable and reusable
☐ we do not package

3.2. Your packaging material for this product is comprised of

95 % from renewable materials % from recycled material
5 % from plastic (various level of recycled materials)

3.3. Type and material, packaging description

Carton tubes, kraft paper, plastic film, adhesive tape

3.4. Your packaging material is produced in

- ☐ country of the head office ☒ same continent where the product is produced
☐ intercontinental

3.5. Where required, additional comments about your packaging

4 | WAREHOUSING AND LOGISTICS

4.1. You produce this product

- ☐ as quickly available warehouse goods ☒ just in time

4.2. You distribute your product (multiple answers possible)

- ☒ directly ☐ via wholesale trade (online & stationary)
☐ via stationary retail trade ☐ via online retail trade

4.3. Where required, additional comments about your Green Logistic

5 | PRODUCT LIFE CYCLE

5.1. With proper daily use, your product lasts about

> 20 years hours/months/years (operational)

5.2. How does the product keep its appearance when used at this frequency?

The product:

- ☐ shows traces of use and/or a nice patina
- ☒ shows a few traces of use, generally not for a while
- ☐ shows rather less traces of use, stays almost unaltered
- ☐ is a consumable and regularly replaced (e.g. candle, soap etc.)

5.3. What is there to say about care/maintenance?

> 20 years is informative only, based on the highest quality of post-treatment. The number is valid for the finished product (laminate surface) using our paper. Care/maintenance is dependent of further processing by our customers.

5.4. Where required, additional comments about the life cycle of the product

Dependent of further processing by our customers.

6 | DISPOSAL AND RECYCLING

6.1. Can your product be recycled after the life cycle?

- ☐ Yes ☐ No
- ☒ partly, namely Could be mechanically recycled (partially) - to some extend

6.2. If so, where, for example?

6.3. How can it otherwise be disposed?

☐ return to manufacturer or dealer

☐ organic waste

☐ Dependent of further processing by our customers.

☐

☐ recycling centre

☒ thermal recycling

☒ residual waste

☒ specialist waste

6.4. Where required, additional comments about disposal and recycling

7 | MISCELLANEOUS

What else you would like to say about the product

(including social-responsibility and environmental standards, ecological analyses, carbon footprint, certification, standards, environmental management systems etc.)
