

Sustainability Statement

1 | RAW MATERIALS AND CONSTITUENTS

1.1. What components or raw materials do you work with?

1. Clays
2. Feldspar
3. Kaolin
4. Color pigments

1.2. Where do you source the individual components or raw materials from?

- From the country of production of this product
- From the continent where we produce this product
- worldwide

1.3. Are the raw materials or components certified or approved according to standards?
If so, which ones?

Yes, ISO 9001 & 14001

1.4. Please clarify the material structure of the final product as well as the material composition expressed in %.

From more to less: Clays | Feldspar | Kaolin | Color pigments

1.5. How high is the proportion of renewable raw materials in your product as a %.

1.6. What % of your raw materials used are recycled materials?

up to 22%

1.7. Where required, additional comments about where you obtain your raw materials from and their origin:

N/A

2.1. Where do you produce your product? (please specify also several production locations)

country of the head office

in

2.2. Is the production operation certified? If yes, in accordance with which one?

ISO 9001:2015, ISO 14001:2015

2.3. How do you grade production energy consumption?

low

normal

high

2.4. What energy source is used for production?

100 % of power from renewable energy

2.5. What % of renewable energy comes from in-house production?

21 % of the electricity comes from renewable, self-generated energies

2.6. The production waste is

for % returned to the production cycle

for 96 % recycled

for % broken down organically (organic waste)

for % thermally recycled (residual waste)

for 4 % professionally disposed of as specialist waste

for 100 % Water recycled

2.7. What are you doing to treat the water used in production or to reduce your "Water Footprint"?

100% of the water used in our production line is recycled thanks to a complex system that only consumes water from general connection due to losses caused by evaporation

2.8. Where required, additional comments about how you obtain energy or dispose of waste

3 | PACKAGING

3.1. What type of packaging do you use?

- disposable packaging reusable packaging both disposable and reusable
 we do not package

3.2. Your packaging material for this product is comprised of

100 % from renewable materials % from recycled material
% from

3.3. Type and material, packaging description

Slabs are transportet with metall or mix wooden-metall racks.
Slabs with Polish and Ultrasoft Surface are foiled.

3.4. Your packaging material is produced in

- country of the head office same continent where the product is produced
 intercontinental

3.5. Where required, additional comments about your packaging

4 | WAREHOUSING AND LOGISTICS

4.1. You produce this product

- as quickly available warehouse goods just in time

4.2. You distribute your product (multiple answers possible)

- directly via wholesale trade (online & stationary)
 via stationary retail trade via online retail trade

4.3. Where required, additional comments about your Green Logistic

5 | PRODUCT LIFE CYCLE

5.1. With proper daily use, your product lasts about

more than 25 years hours/months/years (operational)

5.2. How does the product keep its appearance when used at this frequency?

The product:

- shows traces of use and/or a nice patina
- shows a few traces of use, generally not for a while
- shows rather less traces of use, stays almost unaltered
- is a consumable and regularly replaced (e.g. candle, soap etc.)

5.3. What is there to say about care/maintenance?

EASY TO CLEAN

Using conventional cleaning products, no other type of maintenance is necessary.

5.4. Where required, additional comments about the life cycle of the product

6 | DISPOSAL AND RECYCLING

6.1. Can your product be recycled after the life cycle?

Yes No

partly, namely

6.2. If so, where, for example?

Companies for natural stone recycling and used as filler for building materials.

6.3. How can it otherwise be disposed?

return to manufacturer or dealer

recycling centre

residual waste

organic waste

thermal recycling

specialist waste

6.4. Where required, additional comments about disposal and recycling

7 | MISCELLANEOUS

What else you would like to say about the product

(including social-responsibility and environmental standards, ecological analyses, carbon footprint, certification, standards, environmental management systems etc.)
