

Sustainability Statement

RAW MA	ATERIALS AND CONSTITUENTS
1.1. Wh	hat components or raw materials do you work with?
- P - V	MDF PUR varnish Water-based varnish Cardboard
	here do you source the individual components or raw materials from? From the country of production of this product From the continent where we produce this product worldwide
	e the raw materials or components certified or approved according to standards? so, which ones?
	DF: CARB2 arnish: ISO9001, ISO14001, ISO18001, RAL GZ 430 (EN ISO 50001 partially)
	ease clarify the material structure of the final product as well as the material emposition expressed in %.
	cample: 1m Plinth looden base: 96,5% / Coating: 3,5%
	ow high is the proportion of renewable raw materials in your product as a %. Tooden boards: 96,5%
1.6. Wh	hat % of your raw materials used are recycled materials?
	here required, additional comments about where you obtain your raw materials om and their origin:

2.1. Where do	you produce your product? (please specify also several production locations)
	y of the head office
in	
2.2. Is the pro	duction operation certified? If yes, in accordance with which one?
FSC Certific	cate in 12/2022
2.3. How do y	ou grade production energy consumption?
low	normal high
2.4. What ener	gy source is used for production?
0 % o	f power from renewable energy
2.5. What % of	renewable energy comes from in-house production?
% of	f the electricity comes from renewable, self-generated energies
2.6. The produ	uction waste is
for	% returned to the production cycle
for	% recycled
for	% broken down organically (organic waste)
for	% thermically recycled (residual waste)
for 5	% professionally disposed of as specialist waste
for ⁹⁵	% own central heating system / chip boiler
2.7. What are	you doing to treat the water used in production or to reduce your "Water Footprint"?
2.8. Where red	quired, additional comments about how you obtain energy or dispose of waste

PRODUCTION

3	PACI	KAGING	
	3.1.	What type of packaging do you use?	
		disposable packaging reusable packaging both disposable and reusable	
		we do not package	
	3.2.	Your packaging material for this product is comprised of	
		% from renewable materials 50 % from recycled material	
		50 % from Foil PP	
	3.3.	Type and material, packaging description	
		Packaging for single parts: cardboard, fleece material Parts are placed on pallets or in boxes for transport - reusable packaging possible	
	3.4.	Your packaging material is produced in	
		country of the head office same continent where the product is produced intercontinental	
	3.5.	Where required, additional comments about your packaging	
4	WAR	EHOUSING AND LOGISTICS	
	4.1.	You produce this product	
		as quickly available warehouse goods just in time	
4.2. You distribute your product (multiple answers possible)			
		directly via wholesale trade (online & stationary)	
		via stationary retail trade via online retail trade	
	4.3.	Where required, additional comments about your Green Logistic	
		Ressource efficiency due to modern technology: The packaging is tailored precisely to the goods.	

5.1.	With proper daily use, your product lasts about						
	15	hours/months/years (operational)					
5.2.	How does the product keep its appearance when used at this frequency?						
	The product:						
	shows traces of	f use and/or a nice patina					
	shows a few traces of use, generally not for a while						
	shows rather less traces of use, stays almost unaltered						
	is a consumable	e and regularly replaced (e.g. candle, soap etc.)					
5.3.	What is there to sa	ay about care/maintenance?					
		vide care instructions for each top coating. All surfaces have been tested on chemical and its according to common standards - and have passed.					
5.4.	Where required, a	dditional comments about the life cycle of the product					
	Quality and high end ma	anufacturing processes stand for a long life cycle.					
ISP	OSAL AND RECYCL	LING					
	•						
6.1.		be recycled after the life cycle?					
	Yes No						
	partly, namely	Most furnitures, also furniture parts can be refurbished and/or restored					
5.2.	If so, where, for ex	cample?					
	Supplier						
	Woodworkers, carpente	ers					

PRODUCT LIFE CYCLE

6.3.	How can it otherwise be disposed?					
_	return to manufacturer or dealer organic waste	recycling centre thermal recycling	residuel waste specialist waste			
	Furnitures and furniture parts are usually collected	ed as bulky waste. Wooden parts a	re often separated from the rest			
	and given to other kind of industry for recovery					
6.4.	Where required, additional comments about disposal and recycling					
MISC	ELLANEOUS					
What else you would like to say about the product (including social-responsibility and environmental standards, ecological analyses, carbon footprint, certification, standards, environmental management systems etc.) carbon footprint for companies: www.ecocockpit.de						
	Our surface finishing is working according to Federal Immission Control Act. Biologica filter systems can break down pollutants and solvent-free air and water is given back to nature.					
	We continously focus on ecological processes. Changing lights, including cut optimization, investing in optimized packaging are only some examples
