Product life cycle in the CNW

Short description (max. signs 1100)

13&9 Design's focus is on people, which is why the designers are always determined to create a meaningful connection between a product and its user. As for MIRRO, a luminaire designed in collaboration with designer Sabrina Stadlober, this was achieved by incorporating a reflecting metallic surface element that resembles a mirror and creates a dynamic relationship between user, luminaire and light. Shaped by influences from art, fashion and architecture, MIRRO is an epitome of 13&9 Design's transdisciplinary work and user-focussed philosophy. The shimmering and circular luminaire that will bath any room in warm and welcoming light is available as a wall, ceiling, hanging, table and floor version.
