3 years

Product life cycle in the CNW

### Short description

With a clear line we combine solid wood and metal, strength and airiness, quality and design. With this line - our LINJA collection - we reduce robust materials such as wood and metal so smartly that an almost floating appearance is created. All materials are of the highest quality and combined to create a piece of furniture with lasting value. Our robust solid wood, for example, is treated exclusively with natural oil, allowing it to breathe and thus improve the room climate. Natural solid wood furniture that lasts a lifetime. Real and unique, sustainable and healthy.
