

# Sustainability Statement

## 1 | RAW MATERIALS AND CONSTITUENTS

### 1.1. What components or raw materials do you work with?

Wood  
Glue, wax, oil, water, paint

### 1.2. Where do you source the individual components or raw materials from?

- ☒ From the country of production of this product  
☐ From the continent where we produce this product  
☐ worldwide

### 1.3. Are the raw materials or components certified or approved according to standards? If so, which ones?

EU Timber Regulation No 995/2010  
PEFC Programme for the Endorsement of Forest Certification  
FSC® Forest Stewardship Council

### 1.4. Please clarify the material structure of the final product as well as the material composition expressed in %.

95% wood  
3% glue, paint, varnish

### 1.5. How high is the proportion of renewable raw materials in your product as a %.

95% recycled wood

### 1.6. What % of your raw materials used are recycled materials?

98 %

### 1.7. Where required, additional comments about where you obtain your raw materials from and their origin:

Our precious woods and raw materials come from sustainable, certified and therefore responsibly managed forests (PEFC and FSC®).

**2.1. Where do you produce your product?** (please specify also several production locations)☒ country of the head office☐ in**2.2. Is the production operation certified? If yes, in accordance with which one?**

europlac is an FSC® and PEFC certified company.

**2.3. How do you grade production energy consumption?**☐ low☒ normal☐ high**2.4. What energy source is used for production?**

70 % of power from renewable energy

**2.5. What % of renewable energy comes from in-house production?**

70 % of the electricity comes from renewable, self-generated energies

**2.6. The production waste is**

for % returned to the production cycle

for 90 % recycled

for % broken down organically (organic waste)

for % thermically recycled (residual waste)

for 10 % professionally disposed of as specialist waste

for %

**2.7. What are you doing to treat the water used in production or to reduce your "Water Footprint"?****2.8. Where required, additional comments about how you obtain energy or dispose of waste**

The thermal utilization of the wood waste supplies our production facility with energy.

### 3 | PACKAGING

**3.1. What type of packaging do you use?**

- ☐ disposable packaging    ☐ reusable packaging    ☒ both disposable and reusable  
☐ we do not package

**3.2. Your packaging material for this product is comprised of**

90    % from renewable materials                      7    % from recycled material  
3    % from plastic packaging tapes

**3.3. Type and material, packaging description**

Wooden pallets and cardboard  
ECO tapes made from recycled paper  
Foil

**3.4. Your packaging material is produced in**

- ☐ country of the head office    ☒ same continent where the product is produced  
☐ intercontinental

**3.5. Where required, additional comments about your packaging**

interseroh certification - zero waste solutions  
Packaging requiring system participation in a dual system

### 4 | WAREHOUSING AND LOGISTICS

**4.1. You produce this product**

- ☐ as quickly available warehouse goods    ☒ just in time

**4.2. You distribute your product** (multiple answers possible)

- ☐ directly    ☒ via wholesale trade (online & stationary)  
☐ via stationary retail trade                      ☐ via online retail trade

**4.3. Where required, additional comments about your Green Logistic**

Our logistics attach great importance to optimal connections.

## 5 | PRODUCT LIFE CYCLE

### 5.1. With proper daily use, your product lasts about

at least 25 years      hours/months/years (operational)

### 5.2. How does the product keep its appearance when used at this frequency?

The product:

- ☐ shows traces of use and/or a nice patina
- ☒ shows a few traces of use, generally not for a while
- ☐ shows rather less traces of use, stays almost unaltered
- ☐ is a consumable and regularly replaced (e.g. candle, soap etc.)

### 5.3. What is there to say about care/maintenance?

Commercial wood care products

### 5.4. Where required, additional comments about the life cycle of the product

With good care, an extremely durable product - over many decades

## 6 | DISPOSAL AND RECYCLING

### 6.1. Can your product be recycled after the life cycle?

☒ Yes    ☐ No

☐ partly, namely

### 6.2. If so, where, for example?

Recycling in the wood industry, e.g. in the chipboard manufacture.

**6.3. How can it otherwise be disposed?**

☐ return to manufacturer or dealer

☐ organic waste

☒ recycling centre

☐ thermal recycling

☐ residual waste

☐ specialist waste

**6.4. Where required, additional comments about disposal and recycling**

**7 MISCELLANEOUS**

**What else you would like to say about the product**

(including social-responsibility and environmental standards, ecological analyses, carbon footprint, certification, standards, environmental management systems etc.)  
carbon footprint for companies: [www.ecockpit.de](http://www.ecockpit.de)

Our products can also be manufactured according to the LEED and GREEN BUILDING conditions.
