### Short description (max. signs 1100)

INDEWO® mother earth

The warm "mother earth" color palette merges with the natural character of brushed premium wood, opening up new possibilities in interior design. High-quality digital printing creates distinctive surfaces with depth, character, and a striking visual impact. What makes it truly unique is the tangible wood structure: the natural grain remains perceptible, giving each panel an authentic, tactile experience. This creates a harmonious interplay between appearance and touch, making naturalness not only visible but also tangible.

Each element is one of a kind – shaped by the organic structure of the wood and the creative freedom of digital printing. The "mother earth" tones enhance the warm, earthy feel and bring calmness and elegance into any space.

With INDEWO®, europac aims to preserve the uniqueness of nature while opening up new design possibilities – creating surfaces that combine individuality, quality, and authenticity.
