

Sustainability Statement

1 | RAW MATERIALS AND CONSTITUENTS

1.1. What components or raw materials do you work with?

High-quality MDF board without added formaldehyde
Noble wood
Glue, wax, oil, water, colours

1.2. Where do you source the individual components or raw materials from?

- ☐ From the country of production of this product
☒ From the continent where we produce this product
☐ worldwide

1.3. Are the raw materials or components certified or approved according to standards? If so, which ones?

EU criteria of the Timber Trade Regulation (EU Timber Regulation) No. 995/2010
PEFC - Programme for the Endorsement of Forest Certification Schemesint
FSC® - Forest Stewardship Council

1.4. Please clarify the material structure of the final product as well as the material composition expressed in %.

approx. 95% carrier plate
approx 5% glue, varnish and digital print

1.5. How high is the proportion of renewable raw materials in your product as a %.

100% - because only sustainable noble wood is used - renewable raw material

1.6. What % of your raw materials used are recycled materials?

approx. 95%

1.7. Where required, additional comments about where you obtain your raw materials from and their origin:

Our noble woods and raw materials come from sustainable, certified and therefore responsibly managed forests (PEFC and FSC®)

2.1. Where do you produce your product? (please specify also several production locations)☒ country of the head office☐ in**2.2. Is the production operation certified? If yes, in accordance with which one?**

We are FSC® and PEFC certified company

interseroh - packaging subject to participation in a dual system

We can also produce our materials according to LEED and GREEN BUILDING conditions.

2.3. How do you grade production energy consumption?☐ low☒ normal☐ high**2.4. What energy source is used for production?**

% of power from renewable energy

2.5. What % of renewable energy comes from in-house production?

% of the electricity comes from renewable, self-generated energies

2.6. The production waste is

for % returned to the production cycle

for 55 % recycled

for % broken down organically (organic waste)

for % thermically recycled (residual waste)

for 5 % professionally disposed of as specialist waste

for 40 % wood waste incineration

2.7. What are you doing to treat the water used in production or to reduce your "Water Footprint"?

Recirculation of process water

Modern filtration and treatment systems

Optimisation of production processes

Regular monitoring

2.8. Where required, additional comments about how you obtain energy or dispose of waste

Thermal recycling directly in the company to generate energy (especially heating)

europlac is interseroh certified

3 | PACKAGING

3.1. What type of packaging do you use?

- ☒ disposable packaging ☐ reusable packaging ☐ both disposable and reusable
☐ we do not package

3.2. Your packaging material for this product is comprised of

90 % from renewable materials 7 % from recycled material
3 % from Plastic packaging tapes

3.3. Type and material, packaging description

Transport packaging - wooden pallets and cardboard
ECO tapes made of recycled paper
Plastic straps

3.4. Your packaging material is produced in

- ☐ country of the head office ☒ same continent where the product is produced
☐ intercontinental

3.5. Where required, additional comments about your packaging

Great emphasis is placed on avoidance of unnecessary packaging and plastic

4 | WAREHOUSING AND LOGISTICS

4.1. You produce this product

- ☐ as quickly available warehouse goods ☒ just in time

4.2. You distribute your product (multiple answers possible)

- ☐ directly ☒ via wholesale trade (online & stationary)
☐ via stationary retail trade ☐ via online retail trade

4.3. Where required, additional comments about your Green Logistic

Our logistics planning places the greatest value on avoiding unnecessary traffic routes and looks for optimal connections.

5 | PRODUCT LIFE CYCLE

5.1. With proper daily use, your product lasts about

at least 25 years hours/months/years (operational)

5.2. How does the product keep its appearance when used at this frequency?

The product:

- ☐ shows traces of use and/or a nice patina
- ☒ shows a few traces of use, generally not for a while
- ☐ shows rather less traces of use, stays almost unaltered
- ☐ is a consumable and regularly replaced (e.g. candle, soap etc.)

5.3. What is there to say about care/maintenance?

Commercial wood care products

Can be maintained as normal, like all wood-based materials (if possible, do not use any sharp cleaning agents or cleaning utensils)

5.4. Where required, additional comments about the life cycle of the product

Overall, europlac aims to minimise its environmental impact throughout the entire life cycle and to offer sustainable solutions for wood processing.

6 | DISPOSAL AND RECYCLING

6.1. Can your product be recycled after the life cycle?

☒ Yes ☐ No

☐ partly, namely

6.2. If so, where, for example?

Recycling in the wood industry e.g. chipboard production.

6.3. How can it otherwise be disposed?

☐ return to manufacturer or dealer

☐ organic waste

☐

☐

☒ recycling centre

☐ thermal recycling

☒ residual waste

☐ specialist waste

6.4. Where required, additional comments about disposal and recycling

Trouble-free disposal in residual waste - no special waste

7 | MISCELLANEOUS

What else you would like to say about the product

(including social-responsibility and environmental standards, ecological analyses, carbon footprint, certification, standards, environmental management systems etc.)

carbon footprint for companies: www.ecocockpit.de

FSC® - certified sustainable product

Renewable noble wood material of European and sustainable origin

NO tropical wood is used
